**Inventors**

Chad Boulton

**Field**

Health and Safety

**Patent Status**

Copyright

**Keywords**

Health service use, risk  
assessment, questionnaire,  
prediction, validity

**Technology**

Pra and PraPlus are screening tools that identify elders who are at high risk for using healthcare services heavily in the future. Pra is 8-item questionnaire and PraPlus has additional 9 items that evaluate older persons' medical conditions, functional ability, living circumstances, nutrition and depression.

**Commercial Use**

Risk screening instrument
